

St. Aloysius Preschool February 2026

Themes:

Post Office & M & 14 (2/2-6/2026) – We will learn how to mail a letter and our home addresses. If you think the address we have on file does not match your actual address, please let Mrs. McNally know.

Valentine's, Feelings + V + 15 (2/9-13/2026) – We will talk about God's love and loving one another.

We will also have a Valentine's Party on the 12th

& 13th.

Winter Break (2/14-20/2026) – School Closed. Enjoy the time as a family! This break provides you and your child a wonderful time to work on letter and

number recognition. Letters and numbers are everywhere, so point them out. When your child shows competency, have them take a turn at pointing them out. When they seem to have accomplished recognizing letters, move on to letter sounds.

Dental Hygiene & D & 16 (2/23-27/2026) – We will learn about ways to take care of our teeth this week. If your child hasn't had

their first dentist visit, this is a good time to start this process.

Other Information:

Preschool Valentines: You are welcome to bring in Valentine's (please no food with the valentines) for all the children (20).

This is an excellent time to have your preschooler practice writing their name. Please do not address the valentine to the other children it is easier to pass them out quickly.

Pick Up Routines:

If there is a change in your child's normal pickup routine, please write a note and place it in their folder. We do not

take the child's word for it, because most preschoolers do not have a good sense of which day it is. If you happened to have forgotten your child's regular pick up routine we can let you know what we have recorded for them.

100th Day of School – Feb. 24th the school will celebrate the 100th day of school (as long as we don't

have more snow days). The Preschool will have a special snack that they need to

St. Aloysius Preschool February 2026

count, think of 100 kind things and make a very long centipede. A day of fun for all!

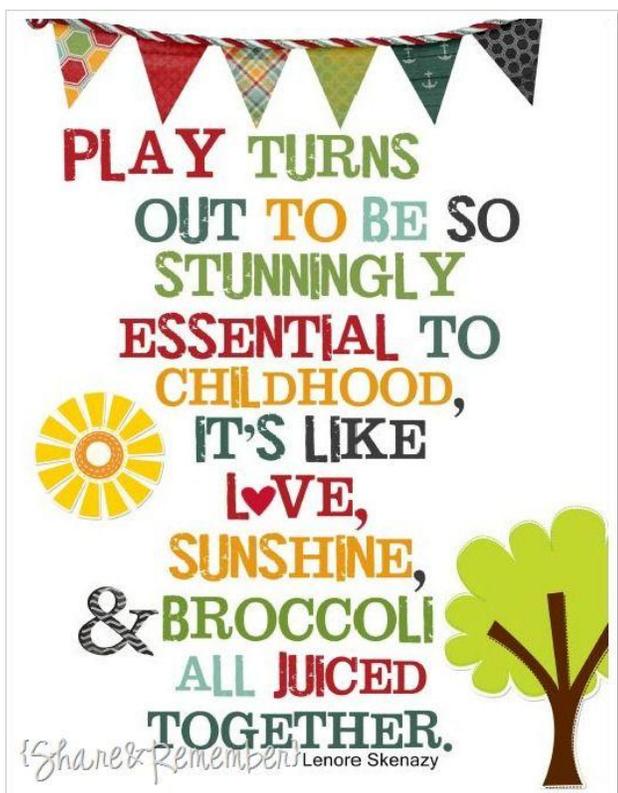

Home Suggestion:

FINE MOTOR TOOLS

Activity: To improve fine motor & counting skills try counting coins and picking them up with a pincher grasp. Other great fine motor

activities are opening clothespins or tongs, stringing beads, squeezing stress balls and dressing oneself. Strengthening fine motor muscles will help to strengthen writing skills.

God Bless,
Mrs. McNally
